

IN THE CLAIMS:

Please cancel Claim 10 without prejudice to or disclaimer of the subject matter presented therein. Please amend Claims 1, 4, and 9 as shown below.

1. (Currently Amended) A solar cell module-mounting structure comprising:

a plate-shaped member having a solar cell module fixed on one surface ~~thereof, thereof;~~
a first support, support member; and
a second support member,
wherein said plate-shaped member is placed on an installation surface so that one side of said plate-shaped member is in contact with the installation surface,
~~wherein a surface of said plate-shaped member opposite to the solar cell module-fixing surface is in contact with said first support member, and out of surfaces including said one side of said plate-shaped member, at least a part of the surfaces in no contact with said first support member is in contact with said second support member~~
wherein a surface of said plate-shaped member including said one side of said plate-shaped member and not in contact with said first support member has a part in contact with said second support member.

2. (Original) The solar cell module-mounting structure according to claim 1, wherein said second support member is a support member in contact with a surface of a

second plate-shaped member opposite to a solar cell module-fixing surface of said second plate-shaped member to support said second plate-shaped member.

3. (Original) The solar cell module-mounting structure according to claim 1, wherein said plate-shaped member is cast from a concrete material.

4. (Currently Amended) The solar cell module-mounting structure according to claim 1, wherein said plate-shaped member, said first support member, and said second support member have the same shape and are made of the same material.

5. (Original) The solar cell module-mounting structure according to claim 1, wherein said solar cell module is fixed to said plate-shaped member with an adhesive.

6. (Original) The solar cell module-mounting structure according to claim 5, wherein said adhesive is an elastic adhesive.

7. (Original) The solar cell module-mounting structure according to claim 5, wherein said adhesive is provided at a surrounding part of said solar cell module.

8. (Original) The solar cell module-mounting structure according to claim 1, wherein said solar cell module is composed of amorphous silicon formed on a stainless steel substrate.

9. (Currently Amended) The solar cell module-mounting structure according to claim 1, wherein said installation surface comprises an insulating member, and wherein is placed between said one side of the said plate-shaped member to be brought into contact with said installation surface and said installation surface is in contact with said insulating member.

10. (Cancelled)

11. (Original) A solar cell module array comprising the solar cell module-mounting structure according to claim 1.

12. (Original) A photovoltaic power generation system comprising a solar cell module array according to claim 11 and a power conditioner.
